"WOBI.CO.IL" WEBSITE

MAIN GOAL: To check whether or not an existing website is working smoothly.

TESTING STEPS PERFORMED:

- ✓ FUNCTIONALITY (Verify there is no dead page or invalid redirects, use wrong inputs to perform negative testing, verify the general workflow of the system)
- ✓ MESSAGING (as part of functionality)
- ✓ UI/UX (Performed to verify the interface)
- ✓ CUSTOMER SERVICE (customer service page content)
- ✓ TRAVEL INSURANCE (travel insurance page content)

Case 1: FUNCTIONALITY

PAGES TESTED: main page, car insurance page, home insurance page, travel insurance page, mortgage insurance page, customer service and UI\UX pages.

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Enter with correct user\password	use correct login info to enter application	Success message and\or action from the system	uncompleted	**fail**	No new user registration available on site
Enter with incorrect user\password	use incorrect login info to enter application	Success message and\or action from the system	uncompleted	**fail**	No user entry section available on site
Enter using correct email	use correct email to enter application	Success message and\or action from the system	uncompleted	**fail**	No user entry section available on site
Enter using incorrect email	use incorrect email to enter application	Error message and\or action from the system	uncompleted	**fail**	No user entry section available on site
Enter using correct phone number	use correct phone number to enter application	Error message and\or action from the system	uncompleted	**fail**	No user entry section available on site
Enter using incorrect phone number	use incorrect phone number to enter application	Error message and\or action from the system	uncompleted	**fail**	No user entry section available on site
Enter without required credentials at all	use no information input at all to enter	Error message and\or action from the system	uncompleted	**fail**	No user entry section available on site
Enter using part of the required information	Use partial information input all to enter	Error message and\or action from the system	uncompleted	**fail**	No user entry section available on site

Case 2: CAR INSURANCE PAGE

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Makif+Hova button checked [1]	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Everything is working correctly	**passed**	Attempt successful
Tzad G+Hova button checked [2]	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Everything is working correctly	**passed**	Attempt successful
How do I choose appropriate insurance link checked	Short info on the subject	Functionality present	Everything is working correctly	**passed**	Attempt successful
Car insurance price consists of link checked	Short info on the subject	Functionality present	Everything is working correctly	**passed**	Attempt successful
What options are there within an insurance policy link checked	Short info on the subject	Functionality present	Everything is working correctly	**passed**	Attempt successful
What to choose: Makif or Tzad G link checked	Short info on the subject	Functionality present	Everything is working correctly	**passed**	Attempt successful
What do I have to know link checked	Short info on the subject	Functionality present	Everything is working correctly	**passed**	Attempt successful

[1] New insurance policy is being created
[2] New insurance policy is being created

Case 3: HOME INSURANCE PAGE

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Bituah mivne + thola button checked	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Everything is working correctly	**passed**	Attempt successful
Bituah mivne button checked	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Everything is working correctly	**passed**	Attempt successful
Bituah thola button checked	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Everything is working correctly	**passed**	Attempt successful

Case 4: TRAVEL INSURANCE PAGE

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Tusu Lahsoh button checked	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Everything is working correctly	**passed**	Attempt successful

Case 5: MORTGAGE INSURANCE PAGE

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Bituah mashkanta button checked	An ability to acquire a new insurance policy after all the info was entered	Functionality present	Functionality is not working correctly	**fail**	Attempt unsuccessful. Redirects to a error message "We will be back to you with all the details"

Case 6: UI/UX

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Outer appearance	General view	Functionality present	Everything is working correctly	**passed**	Attempt successful
Screen control (Elements)	toolbars, colors, typefaces, sizes, buttons, icons, etc.	Functionality present	Everything is working correctly	**passed**	Attempt successful
Simple to Use	Check for being Simple to use	Functionality present	Everything is working correctly	**passed**	Attempt successful
Consistency and Reasonability	Check for Consistency and Reasonability	Functionality present	Everything is working correctly	**passed**	Attempt successful
Accessibility	Check for Accessibility	Functionality present	Everything is working correctly	**passed**	Attempt successful
Usability	Check for Usability	Functionality present	Everything is working correctly	**passed**	Attempt successful
Fonts	Check for Fonts	Functionality present	Everything is working correctly	**passed**	Attempt successful
Icons	Check for Icons	Functionality present	Everything is working correctly	**passed**	Attempt successful
Required fields	Check for Required fields	Functionality present	Everything is working correctly	**passed**	Attempt successful
Data type errors	Check for Data type errors	Functionality present	Everything is working correctly	**passed**	Attempt successful

Case 7: CUSTOMER SERVICE PAGE

Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
WhatsApp button checked	WhatsApp button pressed to check intended functionality	Functionality present	Everything is working correctly	**passed**	Attempt successful
Online form download button checked	Online form button pressed to check intended functionality	Functionality present	Everything is working correctly	**passed**	Attempt successful
Email for contact list link checked	Email for contact list button pressed to check intended functionality	Functionality present	Everything is working correctly	**passed**	Attempt successful
Download forms section link checked	Download forms section button pressed to check intended functionality	Functionality present	Everything is working correctly	**passed**	Attempt successful
Q&A section link checked	Q&A section button pressed to check intended functionality	Functionality present	Everything is working correctly	**passed**	Attempt successful
Insurance company approved service centers and property appraiser section link checked	**Insurance company approved service centers and property appraiser section** link pressed to check intended functionality	Functionality present	Everything is working correctly	**passed**	Attempt successful

TEST SUMMARY REPORT
https://www.wobi.co.il WEBSITE

RAICHMAN EUGENE

TEST SUMMARY REPORT

1. Purpose

This report presents results of the tests done on the Israeli "WOBI.CO.IL" website. The tests performed were carried out over all of the site's functions, such as navigation, menuses, orderly placement of items, color schemes, contact form, accessibility features, etc.

2. Application Overview

The WOBI.CO.IL website is an internet-based assurance company site, designed to sell various insurance programs and benefits, such as home insurance, car insurance, mortgage insurance, life insurance, internet travel insurance.
3. Metrics

Mild - Passed	Major - Failed	Total
12	1	13
BUG CHART

BUG SEVERITY CHART

| MAJOR	MINOR	TOTAL
1	12	13

4. Recommendations

- To have a top menus moved up a little bit to prevent it colliding with buttons
- Re-think the color scheme of the entire site
- Edit and decrease the size of written lines
- Remove the "call telephone" function from the *2744 number, make it a simple text
- Improve the Accessibility function outline, so that neither the buttons – nor the videos are cut
- Improve the "ניגודיות גבוהה" and other accessibility menus options colour scheme, so that buttons do not get cut
- Improve the "partner" bar functionality to allow connection to partners' websites.
- Urgently improve the "contact form" functionality, so it does detect and reject incorrect information.

5. Conclusion

Following the tests performed on the "WOBI.CO.IL" website – a considerable amount of bugs were found. In spite of the presence of the beforementioned bugs, - the website's critical functions (navigation, menuses, orderly placement of items, color schemes, contact form, accessibility features, etc.) work properly. As a result - I recommended releasing the site to the public

.6. Bugs report

✓ Main page slogan "פשוט להשוות ולקנות חכם" visibility is obstructed by top menus. (SEVERITY - MILD)
✓ *2744 phone number function tries to make a phone call from a client's PC, and asks for the relevant permission. (SEVERITY - MILD)

✓ Accessibility function does not work correctly, since it leads to the bad color scheme, and buttons are cut in the middle. (SEVERITY - MILD)

✓ Using a "ניגודיות גבוהה" option of a accessibility menus leads to a very unorderly color scheme and buttons are cut. (SEVERITY - MILD)
- ✓ Using a "ניגודיות גבוהה" option of an accessibility menus, when pressed, does not disappear and leads to a video fragment being obstructed. (SEVERITY - MILD)
- ✓ Using a "ניגודיות גבוהה" option of a accessibility menus, when pressed, does not disappear and leads to a very unorderly color scheme, thus obstructing buttons. (SEVERITY - MILD)
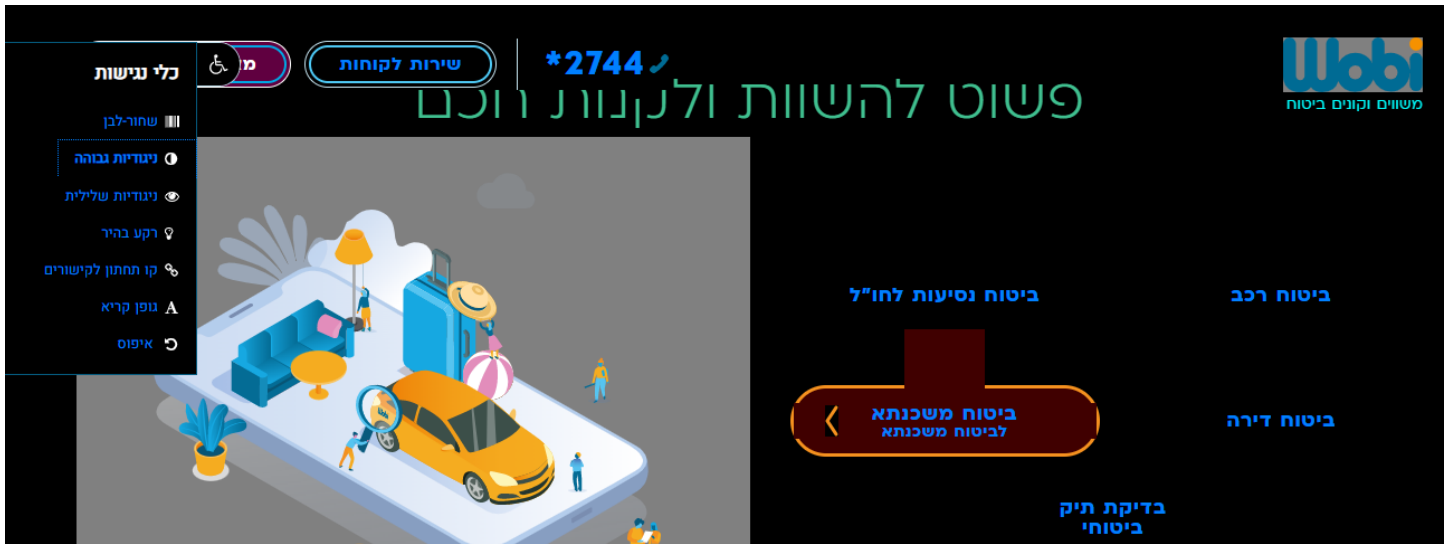

- ✓ Using a "ניגודיות גבוהה" option of a accessibility menus, when pressed, does not disappear and leads to a very unorderly color scheme, thus obstructing a company logo. (SEVERITY - MILD)

- ✓ Using a "ניגודיות שלילית" option of a accessibility menus, when pressed, does not disappear and leads to a very unorderly color scheme, thus cutting buttons. (SEVERITY - MILD)

- ✓ Top menus bar and company logo do not disappear when the page is being rolled, thus making it difficult to see what is written. (SEVERITY - MILD)

✓ Using a "רקע בהיר" option of a accessibility menus, when pressed, does not disappear and leads to a very unorderly color scheme, thus cutting buttons. (SEVERITY - MILD)

✓ The partner bar contains only highlightable logos, but does not allow getting to the partner's website. Buttons are not pressable and deactivated. (SEVERITY - MILD)

✓ Using the Chrome browser (109.0.5414.75 64-bit official build) to operate the electronic contact option does not work correctly: it does not allow choosing "סיבת הפניה" and "מוצר" options, neither does it allow sending a form without filling a "מוצר" and "סיבת הפניה" options. (SEVERITY - MILD)

"LINKED IN" MOBILE APPLICATION

MAIN GOAL: To check whether or not a completely designed and written mobile application is working smoothly on different device types and operating systems.

TESTING STEPS PERFORMED:

- ✓ FUNCTIONALITY (Verify there is no dead page or invalid redirects, use wrong inputs to perform negative testing, security, encryption, vulnerabilities, verify the general workflow of the system)
- ✓ NETWORK (as part of functionality)
- ✓ MESSAGING (as part of functionality)
- ✓ PUBLICATIONS
- ✓ VACANCIES
- ✓ UI/UX (Performed to verify the interface and the dataflow from one system to other)
- ✓ COMPATIBILITY (Browser compatibility, operating system compatibility, device compatibility (notebook, mobile, etc.))
- ✓ USABILITY (navigation and controls, content checking, user intuition, localization)

Case 1: FUNCTIONALITY

Pages tested: login to (and using of) profile page, network page, messaging page, publications page, vacancies page, etc.
Test steps:

Test type	Explanation	Expected result	Actual result	Pass\fail	Remarks
Enter with correct user\password	use correct login info to enter application	Success message and\or action from the system	everything is working correctly	**passed**	Enter attempt accepted
Enter with incorrect user\password	use incorrect login info to enter application	Success message and\or action from the system	everything is working correctly	**passed**	Enter attempt accepted
Enter using correct email	use correct email to enter application	Success message and\or action from the system	everything is working correctly	**passed**	Enter attempt accepted
Enter using incorrect email	use incorrect email to enter application	Error message and\or action from the system	everything is working correctly	**passed**	Enter attempt rejected – credentials incorrect
Enter using correct phone number	use correct phone number to enter application	Error message and\or action from the system	everything is working correctly	**passed**	Enter attempt rejected – email + password required to enter
Enter using incorrect phone number	use incorrect phone number to enter application	Error message and\or action from the system	everything is working correctly	**passed**	Enter attempt rejected – email + password required to enter
Enter without required credentials at all	use no information input at all to enter	Error message and\or action from the system	everything is working correctly	**passed**	Enter attempt rejected – email + password required to enter
Enter using part of the required information	Use partial information input all to enter	Error message and\or action from the system	everything is working correctly	**passed**	Enter attempt rejected – credentials required to enter
Security standard check	Check for the Security standard used	Show SSL status system message	everything is working correctly.	**passed**	Site and application are both SSL-encrypted
	CERT SIGNATURE ALGORITHM	Certificate Success \ Error message and\or action from the system	everything is working correctly.	**passed**	No Certificate Error message and\or action was received from the system

		Certificate Success \ Error message and\or action from the system	everything is working correctly.	**passed**	No Certificate Error message and\or action was received from the system
	CERT_TUST	Certificate Success \ Error message and\or action from the system	everything is working correctly.	**passed**	No Certificate Error message and\or action was received from the system
	CERT_EXPIRATION STATUS	Certificate Success \ Error message and\or action from the system	everything is working correctly.	**passed**	No Certificate Error message and\or action was received from the system
	CERT_CRL REVOKED	Certificate Success \ Error message and\or action from the system	everything is working correctly.	**passed**	No Certificate Error message and\or action was received from the system
	CERT_OCSP REVOKED	Certificate Success \ Error message and\or action from the system	everything is working correctly.	**passed**	No Certificate Error message and\or action was received from the system

SSL CERTIFICATION PROTOCOLS USED	SSLv2	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	**passed**	SSL_CK_RC4_128_WITH_MD5 128 BITS. STILL IN USE. HOWEVER – DOES NOT SUPPORT THE US FIPS 140-2 STANDARD
	SSLv3	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	**passed**	TLS_ECDHE_RSA_WITH_AES_256_GCM_SHA384 256 BITS_TLS 1.2
	TLS1_2	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	**passed**	TLS_RSA_WITH_AES_256_CBC_SHA AES WITH 256-BIT KEY
	ALPN_HTTP2	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	**passed**	TLS_ECDHE_RSA_WITH_AES_128_GCM_SHA256

VULNERABILITIES CHECK PROTOCOLS USED	HEARTBLEED	EP Success \ No error message and\or action from the system	Everything is working correctly.	Not vulnerable

TEST SUMMARY REPORT

1. Purpose

This report presents results of the tests done on the "LinkedIn" mobile application. The tests performed were carried out over all of the site's functions, such as navigation, menuses, orderly placement of items, color schemes, contact forms, etc.

2. Application Overview

LinkedIn is the world's largest professional network on the internet. You can use LinkedIn to find the right job or internship, connect and strengthen professional relationships, and learn the skills you need to succeed in your career. You can access LinkedIn from a desktop, LinkedIn mobile app, mobile web experience, or the LinkedIn Lite Android mobile app.
3. Metrics

Mild - Passed	Major - Failed
49	4

BUG CHART
BUG SEVERITY CHART

MAJOR	MINOR	TOTAL
4	49	53

4. Recommendations

- ✓ Create a "Use a templet to post a vacancy" option to add vibrancy to posts
- ✓ Create a "Add a document to post a vacancy" option to add ease of creating to posts
- ✓ Create a "Share a status within a vacancy" option to add liveliness to posts
- ✓ Create a "Questionnaire within a vacancy" option to add functionality to posts

5. Conclusion

Following the tests performed on the "LINKEDIN" MOBILE APPLICATION – a small amount of bugs was found. In spite of the presence of the beforementioned bugs, - the website's critical functions (navigation, menuses, orderly placement of items, color schemes, contact form, etc.) work properly. As a result - I recommended releasing the site to the public.

6. Bugs report

- ✓ "Use a templet to post a vacancy"   option is inactive or missing
- ✓ "Add a document to post a vacancy" option is inactive or missing
- ✓ "Share a status within a vacancy"   option is inactive or missing
- ✓ "Questionnaire within a vacancy"   option is inactive or missing

	ALPN_HTTP2	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	**passed**	TLS_ECDHE_RSA_WITH_ _AES_128_GCM_SHA256
"Breach" protocol	a specific kind of Quickhack that uploads Daemons onto a network	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	Passed – **error message** received	Daemon as a background process that handles periodic service requests from remote processes. It is alerted to the request by the operating system and is autonomous (it can choose whether to complete a request itself or forward it to another program or process). Being a rootkit – it is hidden from the OS and could damage the device and mislead a user by modifying the security state of a system.
"LUCKY13" protocol	a cryptographic timing attack that can be used against implementations of the Transport Layer Security (TLS) and Datagram Transport Layer Security (DTLS) protocols using the Cipher Block Chaining (CBC) mode of operation.	EP Success \ Error message and\or action from the system	Supported. Everything is working correctly.	Passed – **error message** received	This breach uses TLS CBC ciphers and affects the TLS 1.1 and 1.2 and DTLS 1.0 or 1.2 implementations. It also affects previous versions such as SSL 3.0 and TLS 1.0. As a result of a successful attack - an attacker exploiting this vulnerability is able to read the plaintext of a TLS encrypted session. This can result in the loss of sensitive information.
